

Top reasons to buy Maintenance Subscription

The smart choice for the best value

Autodesk® Maintenance Subscription helps you effectively maintain your perpetual license of Autodesk software. Through immediate access to the latest Autodesk software releases, you can increase productivity by utilizing the newest technologies and time-saving features. Staying current with Maintenance Subscription lowers your upgrade costs, helping you maintain a predictable software budget. It's the best and most economical way to stay ahead of your competition.

> Access to the latest product enhancements and software releases

Delivers up-to-date technology conveniently and cost-effectively

Maintenance Subscription provides access to the software releases your users are licensed for, as well as any periodically released enhancements to those products.* Your users can increase productivity—and gain a significant competitive edge in the marketplace—by using the most advanced Autodesk software and timesaving features. Continuous access to the latest Autodesk design tools and cloud services enables users to accomplish tasks they simply can't achieve with outdated technology.

> Predictable budgeting—and cost savings

Pay less and get more

Maintenance Subscription helps make software costs more predictable for your business because it's an easy and cost-effective way to stay up to date with Autodesk software. Whether you choose a one-year or multiyear contract, your costs are known for the entire term.

Maintenance Subscription for a stand-alone product or suite also gives your users access to a variety of Autodesk cloud services for rendering, optimization, and analysis—which can help to dramatically reduce costs and save time. Rendering in the cloud, for example, can eliminate the need to invest in expensive hardware or pay third-party providers. And users don't need to spend countless hours tying up their desktops to produce high-quality visualizations of their designs.

> Flexible licensing rights

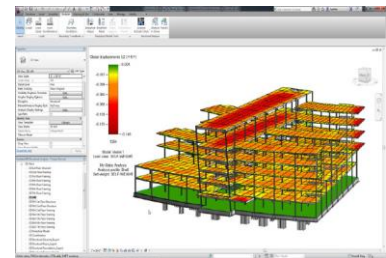

Access the software you need, wherever you need it

Maintenance Subscription features flexible licensing rights—Previous Version Rights, Home Use Rights, and Extra Territory Rights—so your users can have the right tools at the right time, wherever their location.** As working remotely becomes increasingly common, it is important for your users to have access to both previous and current versions of their desktop software; to install Autodesk software on their home and office computers; and to use it in multiple locations. The ability to easily access previous versions of Autodesk software means users can be better prepared to work with customers who may not be using the latest Autodesk technology in their projects.

> Operational efficiencies

Make design files available to anyone, anytime, anywhere

Maintenance Subscription customers receive 25 GB of Autodesk cloud storage per named user, greater computing capacity, and access to a variety of cloud services. This means your users can increase mobility, streamline collaboration, and take full advantage of the virtually infinite computing power of the cloud to visualize, optimize, and share more design options.

> Administrative tools

Track and manage software licenses and seats easily

The Autodesk Subscription Center offers administrative tools to help you manage your Maintenance Subscription benefits. Reporting and management tools for Contract Managers and Software Coordinators include:

- **Coverage report**—for tracking and managing software licenses and seats
- **User management features and tools**—for controlling which of your users have access to Maintenance Subscription benefits
- **Autodesk 360 usage report**—for tracking consumption of cloud credits used for some Autodesk 360 cloud services
- **Renewal report**—for receiving updates on contracts set to expire in 90 days or less

> Support for users

Gain visibility into user's software support cases

The Maintenance Subscription program includes Basic Technical Support, which connects users to product support specialists who can assist with installation, configuration, troubleshooting, and other needs—helping users to reduce downtime and increase productivity. (Premium levels of support are also available for purchase.) Users also receive access to online support that includes a knowledge base with help documents, tutorials, training videos, the opportunity to search an extensive collection of Autodesk technical solutions and community support forum threads, as well as exclusive newsletters to help you get the most from your subscription.

With web-based tracking and management tools, you'll gain visibility into all of your users' Autodesk software support cases, so you can better understand how they are using the products and determine if they have access to the right solutions. Technical support from Autodesk also helps your organization work effectively with channel partners.

> Increased cloud storage

Reduce your organization's server storage costs

Autodesk cloud services give your users the ability to extend their designs beyond the desktop—and to work wherever business takes them or they feel they will be most effective. Maintenance Subscription customers are provided 25 GB of Autodesk cloud storage space per named user, so users can complete more computing-intensive tasks in the cloud. And by storing design documents in the cloud, your users can access each other's work and connect with each other, anytime, anywhere while helping your organization reduce its server storage costs.

> Security

Collaborate with project stakeholders securely in the cloud

Autodesk cloud services are secure—so users can confidently share their designs with customers and other project stakeholders wherever and whenever they need to. Autodesk cloud services are hosted in world-class, third-party cloud data centers and in Autodesk's own cloud data centers. All data centers are located in the United States and feature architectures built on accepted methods and industry standards for security, scalability, service, and availability. For more about the security of Autodesk cloud services, visit the Autodesk Trust Center: www.autodesk.com/trust/overview.
